KRESLA

WORLD-CLASS UI/UX DESIGN SPECIFICATION

Antigravity Design Instructions

PROJECT OVERVIEW

Design an ultra-modern, premium, intuitive, and visually stunning real estate marketplace called **Kresla**.

Kresla is not simply another property listing website.

It should feel like the **Apple** of real estate platforms.

The experience should combine the elegance of Airbnb, the discoverability of Zillow, the trust of Booking.com, the engagement of Instagram, and the speed of Google Maps.

Every interaction must feel effortless.

Every screen should encourage users to continue exploring.

Every animation should reinforce trust and delight.

DESIGN PHILOSOPHY

The platform should communicate:

- Trust
- Simplicity
- Premium Quality
- Transparency
- Safety
- Modern Technology
- Speed
- Reliability

Users should feel:

> "I can confidently find my next home here."

DESIGN LANGUAGE

Design Style:

Modern Minimalism

Premium SaaS

Glassmorphism (light usage)

Soft Shadows

Rounded Corners

Large Cards

Generous White Space

Smooth Animations

Responsive Layouts

Subtle Gradients

Professional Typography

Avoid clutter.

Avoid excessive text.

Avoid dense interfaces.

PRIMARY BRANDING

Primary Color

1034A6

Secondary Colors

White

Light Gray

Dark Navy

Accent Colors

Emerald Green (Success)

Orange (Attention)

Red (Warnings)

Gold (Verified)

LOGO

Simple Capital Letter

C

Modern geometric icon

Premium

Recognizable

TYPOGRAPHY

Use clean modern fonts.

Recommended:

Inter

SF Pro Display

Manrope

Poppins

Hierarchy

Large Hero Titles

Medium Headings

Comfortable Paragraphs

Readable Buttons

GLOBAL EXPERIENCE

The application must feel fast.

Every transition

200ms–350ms

Smooth easing

No lag

No sudden jumps

Every screen should load progressively using skeleton loaders.

FIRST EXPERIENCE

Users should immediately see:

Beautiful hero property

Search bar

Popular locations

Trending properties

Recommended properties

Recently listed

Interactive map preview

Never show a blank screen.

ONBOARDING

Three beautiful onboarding screens.

Explain:

Find Property

List Property

Message Landlords

Simple illustrations.

Minimal text.

Skip button.

Continue button.

Progress indicator.

LOGIN EXPERIENCE

Allow exploration before login.

Only require authentication when:

Saving favorites

Sending messages

Posting property

Reviews

Account management

Authentication options:

Map pins

Everything should feel alive.

Nothing should feel distracting.

LOADING EXPERIENCE

Skeleton loaders.

Animated placeholders.

Blur loading.

Lazy image loading.

Infinite scrolling.

EMPTY STATES

Never show empty pages.

Instead display:

Illustrations

Suggestions

Popular Properties

Search Tips

Nearby Listings

ERROR STATES

Friendly language.

Helpful illustrations.

Retry buttons.

Support links.

DARK MODE

Fully supported.

Every screen.

No inverted colors.

Professionally optimized.

ACCESSIBILITY

High contrast.

Large touch targets.

Keyboard support.

Screen reader support.

Color blind friendly.

RESPONSIVE DESIGN

Desktop

Tablet

Mobile

Large Screens

Ultra-wide Screens

Foldable devices

PERFORMANCE TARGETS

First load under 2 seconds.

Lazy load all images.

Optimize videos.

CDN delivery.

Compress assets.

Offline caching.

SECURITY UX

Visible verification.

Privacy indicators.

Secure messaging.

Suspicious listing alerts.

Safe browsing indicators.

PSYCHOLOGY & RETENTION

Use ethical engagement patterns that encourage exploration without manipulating users.

Curiosity:

- "New listings near you"
- "Recently updated"

Progress:

- Saved searches
- Profile completion
- Listing completeness for landlords

Personalization:

- "Recommended for you"
- "Similar properties"

Freshness:

- Recently listed
- Recently reduced prices
- Open viewing events

Social proof:

- Number of views
- Verified reviews
- "Contacted by X users this week" (where appropriate)

Celebrate actions with subtle confirmations:

- Property saved
- Listing published
- Viewing booked

KNOWN PLATFORM WEAKNESSES TO AVOID

Do not copy these common issues found across existing platforms:

❌ Slow search

❌ Cluttered filters

❌ Tiny property images

❌ Poor mobile experience

❌ Fake listings

❌ No verification

❌ Outdated listings

❌ Confusing navigation

❌ Hidden contact information

❌ Slow messaging

❌ Inconsistent layouts

❌ Pop-up overload

❌ Excessive advertisements

❌ Complicated property posting

❌ Low-quality photos

PREMIUM EXPERIENCE GOALS

A first-time visitor should think:

"This is the most professional property platform I've ever used."

A landlord should think:

"My properties look exceptional here."

A tenant should think:

"I trust the listings and can quickly find what I need."

An administrator should think:

"I have complete visibility and control over the platform."

FINAL DESIGN PRINCIPLE

Every screen must answer three questions immediately:

1. What can I do here?

2. What should I do next?
3. Why should I trust this platform?

If any screen fails to answer those questions within the first few seconds of use, redesign it until it does.
